Industry Facts

Export to over 200 countries

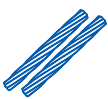

World's 1st marble, travertine, ecaussine exporter

World's 1st radiator and towel warmer products exporter

World's 1st rebar exporter

World's 1st stranded wire exporter

Europe's 1st and World's 3rd cement exporter

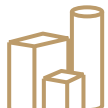

World's 4th processed natural stone exporter

World's 4th and Europe's 1st cement production exporter

World's 4th heating boilers exporter

World's 4th biggest tubes and pipes exporter

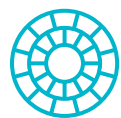

World's 4th biggest profiles exporter

Europe's 4th split air conditioners exporter

Europe's 1st and World's 5th ceramic sanitaryware manufacturer

Europe's 3rd and World's 5th ceramic tiles exporter

World's 5th flat glass manufacturer

World's 5th electric conductors exporter

World's 6th airport passenger boarding bridges exporter

World's 6th biggest energy transmission lines exporter

World's 6th biggest aluminium profiles and bars exporter

World's 7th fibre board of wood or other ligneous materials exporter

Europe's 7th liquid meters, incl. calibrating meters exporters

World's 8th aluminium folio exporter

World's 10th biggest steel exporter

Reasons Why You Should Prefer Turkish Construction Materials

Innovation:

Innovative thinking and innovations in all areas help to accelerate the sector by implementing the possibilities of technology.

High range of products with technology:

Turkish construction materials rapidly complete their evolution and increase their digitalization rates which represent many products from iron and steel industry to cement, glass, ceramic, paint and wood sector. In addition to meeting the domestic demand it also has a high export share with high rankings in international markets and compete with success.

Ability to meet the world standards:

In order to investigate the external market demand profiles, dissemination of production in accordance with the desired quality and environmental standards around the world provides the basis for the Turkish construction sector to be among the few countries of the world in terms of sub-sectors.

Quality:

In spite of many commercial barriers such as anti-dumping investigations and tax increases, many construction sector materials, especially the steel industry, have adopted an important place in world exports by adapting to the developing technology. In addition, among the Turkish construction sector products, there are materials that make buildings more durable and consequently reduce their maintenance and repair requirements.
