**Ancient Beauty  
with a Modern Twist**

## Turkish Jewellery

Globally recognized for its beauty, innovation and quality, Turkish jewellery is an ancient heritage of Asia Minor, where gold was first refined and the first coins of history were minted. With a history as old as 7,000 years, metals, precious and semi-precious stones were all crafted here to set the standards of international beauty and wealth. Enriched by the deep-rooted culture of the Hittites, Urartians, Phrygians, Ionians, Lydians, Romans, Byzantines, Seljuks, Ottomans and many more, the fruits of immense variety and creativity are presented to please the appetites of millions of people all around the world, and define the "golden ratio" of beauty.
