

Turkish Stones

Boasting a past literally as old as time, natural stone is the oldest construction material used by man. Turkey is located in one of the oldest marble production geography experiencing 4,000 years natural stone production background starting at Marmara Island.

With immense reserves of marble, travertine, onyx, conglomerate, breccia and magmatic rocks reserves, Turkey is the indisputable leader of natural stone. And it is not all about quantity: the excellent quality and endless variety of colors and textures make Turkey the top choice of hundreds of countries all around the globe.

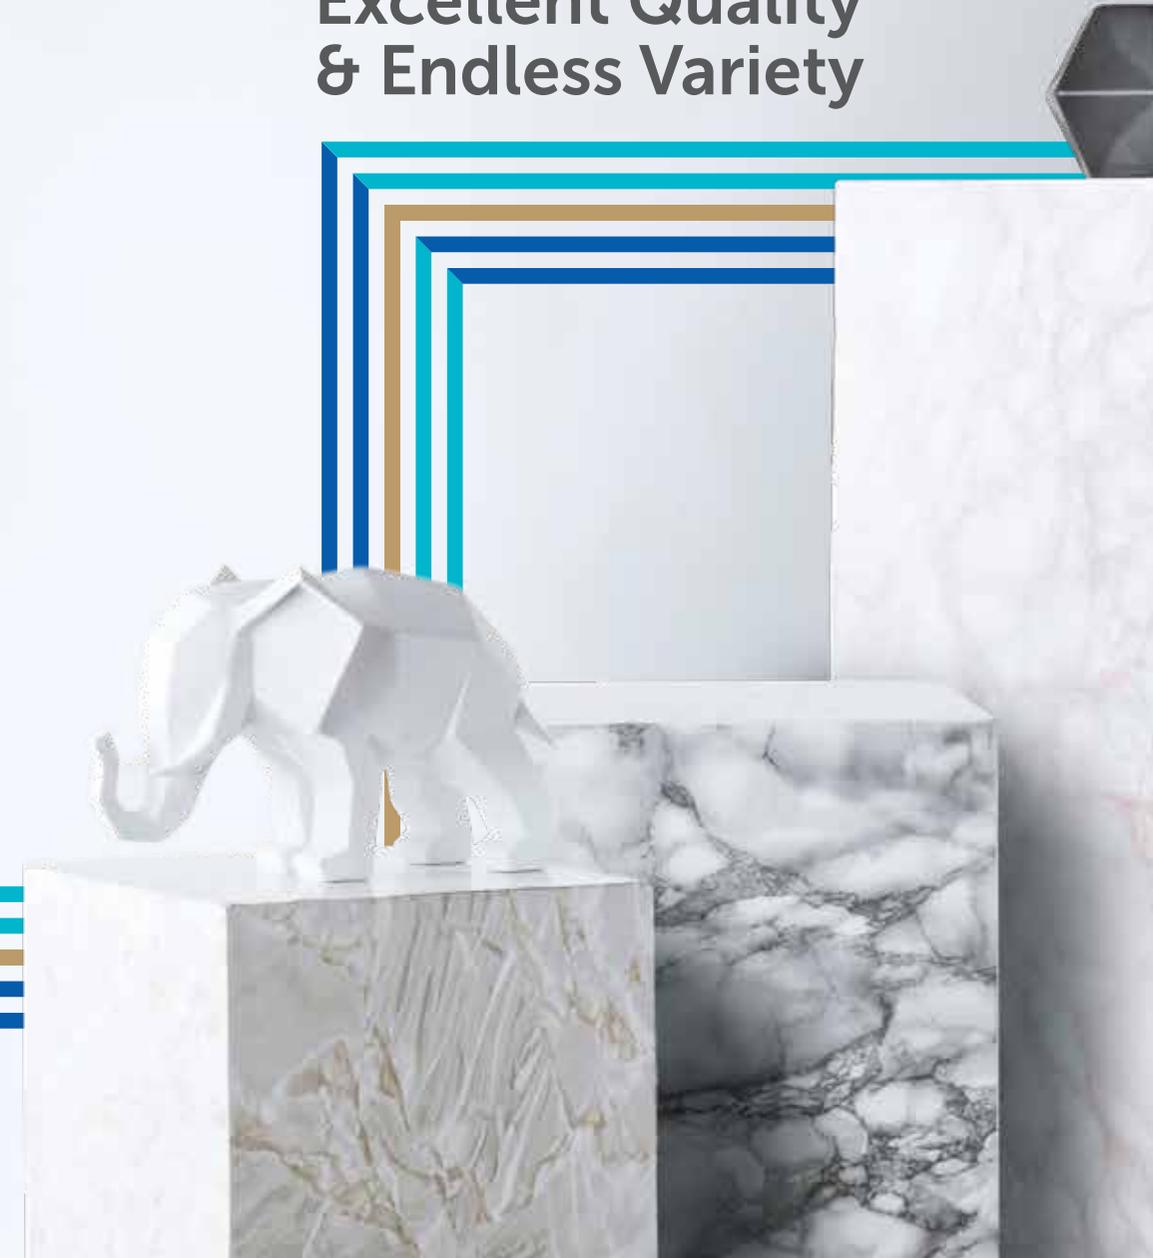

From a couple of the World's Seven Wonders to more modern attractions including no less than St Peter's Cathedral, the White House and Disneyland, Turkish marbles are admired in countless locations, varieties and forms. Adding other basic stones such as granite, limestone, travertine, basalt, sandstone, serpentine, diabase, and slate to the scene, be ready to embrace the natural beauties offered by Turkey to your pleasure...

Stone Types

- ✔ Marble
- ✔ Basalt
- ✔ Granite
- ✔ Travertine

Industry Facts

Exported to 200 different countries

More than 1.500 marble quarries, 2.000 factories and about 9.000 workshops operating in the sector

33% of the world's natural stone reserves

Top natural stone importers: USA, Saudi Arabia, India, Iraq, Israel, France, UAE and Australia

90% of quarries located in the west of Anatolia

Top block marble and travertine importers: China, India, Italy, Egypt, Taipei, Indonesia

The total marble production capacity is 6,5 million m²

All the data provided are either as of or prior to 2018.

Reasons Why You Should Prefer Turkish Natural Stone

01 Ultimate quality and production capacity

Highly experienced sector agents **06**

Modern production equipment and methods **02**

07 In compliance with international standards

03 Investment in design and innovation

Production and cutting in all commercially required sizes and quality standards **08**

Unlimited color and pattern variety (over 650) **04**

09 Global reputation of unique features

05 Geopolitical location close to major markets

Production and design with the state of art technologies **10**
